Software Engineer | Full-Stack Developer | AI-Augmented Builder

About Me

Final-year BSc Computer Science student at Eastern University of Sri Lanka with a strong foundation in software engineering, full-stack development, and system design. Proficient in Python, JavaScript, and Go, with hands-on experience building and deploying scalable web applications on cloud and VPS infrastructure. Passionate about writing clean, maintainable code and leveraging AI tooling to accelerate development cycles. Eager to contribute to high-performance engineering teams solving real-world problems.

EDUCATION

Eastern University of Sri Lanka, Trincomalee Campus

BSc in Computer Science

Jul 2023 – Present
Trincomalee, Sri Lanka

- CGPA: 3.5
- Relevant Coursework: Software Engineering, Problem Solving, Data Structures & Algorithms, Software Testing, Networking, Artificial Intelligence

EXPERIENCE

Eastern University of Sri Lanka, Trincomalee Campus

Web Developer - Group Work

Jul 2025 – Dec 2025
Trincomalee, Sri Lanka

- Architected and developed the university society's gallery page using React with component-driven design.
- Improved UI/UX through responsive layouts, accessibility improvements, and modern frontend techniques.
- Delivered Figma prototypes and translated designs into production-ready code.
- Technologies: React, Figma

SmartNet Communication

Software & Hardware Troubleshooter

Jul 2022 – Jul 2023
Kattankudy, Sri Lanka

- Diagnosed and resolved hardware/software issues, reducing average resolution time significantly.
- Installed and configured operating systems, drivers, and enterprise applications across client machines.
- Technologies: Windows, Linux, Drivers

PROJECTS

Linux Server Manager - Final Year Project (2025) | Node.js, React, Docker, PM2, VPS

- Final-year research project: built a full-stack server management dashboard addressing gaps in existing tools.
- Implemented real-time process monitoring, container management via Docker, and remote deployment pipelines.
- GitHub: github.com/adhilNuckz/finalproject

Digitel Hosting Platform (2025) | Node.js, React, PM2, VPS, Cloud

- Built a self-service frontend hosting platform with free subdomain provisioning and REST API integration.
- Managed full deployment lifecycle: server provisioning, DNS configuration, and uptime monitoring.
- GitHub: github.com/adhilNuckz/digitel-frontend-hoster | Live: digitel.site

gdup – Google Drive CLI Manager (2025) | Python, Linux, Windows

- Engineered a cross-platform CLI tool to manage Google Drive files and generate shareable links programmatically.
- GitHub: github.com/adhilNuckz/g-dup | Live: gdup.nighttime.online

ZigZag (2026) | Tor, React, Node.js

- Designed and built a decentralized, privacy-first social platform operating over the Tor network.
- GitHub: github.com/adhilNuckz/zigzag

SKILLS

Languages: Python, JavaScript, Go, C/C++, Java, PHP, Bash

Frontend: React, Next, HTML/CSS

Backend & Runtime: Node.js, NestJS, Laravel, REST APIs

DevOps & Infra: Docker, PM2, CI/CD, VPS, Cloud, Linux, Server Management

Tools: Git, Figma, AI Agents, n8n, Vibe Coding

Other: Domain Management, Hosting, Penetration Testing (foundational)

AI Tools: Claude , OpenCode , Codex

AWARDS & CERTIFICATES

Google - Foundations: Data, Data, Everywhere (Verify: SHZIBPSOJ2N1)

KodeCloud – Docker

HackerRank – MySQL

Hack & Fix – Cybersecurity (Anti-Phishing)
